DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 15, 24, and 30, drawn to a method of determining whether a plurality of microphones having sufficiently matched frequency response characteristics, classified in class 381, subclass 92.
- II. Claims 2, 16, 25, and 31, drawn to a method of determining the arrangement of microphones in an array, classified in class 381, subclass 58.
- III. Claims 3-11, 14, 17-23 and 26-29, drawn to a directional microphone system and method for providing a directional microphone signal, classified in class 381, subclass 92.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as matching microphones that are used in signal processing devices which require their sensitivities to be equal, such as in noise cancellation devices having a signal-and-noise microphone and a noise-only microphone and in hearing aid device. Invention III can be used for beamforming applications. See MPEP § 806.05(d).

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be

separately usable. In the instant case, invention II has separate utility such as cataloging microphones by their resonant frequency. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for each group is distinct, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
